

CATEGORY:

Bare Ground / RxR

Roadside / ROW

ACTIVE  
INGREDIENT:

Bromacil (40%) & Diuron (40%)

PRODUCT:

**BROMACIL/DIURON  
40/40**

America's VM Specialists

## The Undefeated Champion of Bareground Weed Control

### Label Details:

- Signal Word CAUTION
- Groups 5 & 7

### Use Sites:

Non-cropland areas

- Barrier strips
- Fence rows
- Fuel storage areas
- Pipelines
- Roadsides
- Tank farms
- Railroad and Utility rights-of-way

**Bromacil/Diuron 40/40 Herbicide** provides proven, season-long control of annual and perennial grasses, broadleaf weeds and brush.

- Long lasting residual
- Consistent performance
- Excellent tank mix partner
- Proven tough on problem annual and perennial weeds

### Common Tank-mix partners

2,4-D  
Dicamba 4  
Dryphosate 75SG

Flagstaff®  
Imazapyr 4SL  
Panoramic® 2SL

Promenade®  
SFM 75  
Triumph® 22K

# BROMACIL/DIURON 40/40

## HERBICIDE

### Active Ingredients:

- **Bromacil:** Group 5 Photosystem II Inhibitor
- **Diuron:** Group 7 Photosystem II Inhibitor

Bromacil and Diuron both work as PSII Inhibitors at different binding sites. For best resistance management practices, always use multiple modes of action in the tank.

### Use Tips / For Best Results:

- For best results, Bromacil/Diuron 40/40 Herbicide needs adequate moisture to be incorporated into the soil.
- Bromacil/Diuron 40/40 Herbicide primarily works through root uptake and has limited contact activity on target plants. After weeds have emerged, the addition of a burndown herbicide like Dryphosate 75SG or other common burndown herbicides will improve initial control of target species.
- When tank mixing with Bromacil/Diuron 40/40 Herbicide, thoroughly mix the product in the spray tank carrier (water) before adding any other herbicide or spray adjuvant. Perform a small compatibility test before adding the products into the spray tank using a combination of products not previously used.
- **Mixing in Water** – Always follow the W.A.L.E.S. order of mixing. Fill Tank half full of water. Add Bromacil/Diuron 40/40 first followed by additional dry materials, then liquids, emulsifiables and finally - surfactants.

### Targeted Weeds: (See label for complete list)

#### Broadleaves

Curly Dock (p)  
Dandelion (p)  
Dogbane (p)  
Goldenrod (a/p)  
Kochia (a)  
Marestail (a)

Mustards (a/p)  
Pigweed (a)  
Prickly Lettuce (a)  
Puncturevine (a)  
Ragweed (a/p)  
Russian Thistle (a)

#### Grasses & Sedges

Bahiagrass (p)  
Bermudagrass (p)  
Bluegrass (p)  
Bromes (a/p)  
Foxtail (a)  
Goosegrass (a)  
Italian Ryegrass (a)  
Johnsongrass (p)  
Nutsedge (p)  
Quackgrass (p)  
Rye, Feral (a)

a= annual p=perennial

Puncturevine

Russian Thistle

Johnsongrass

Pigweed
