

FALCON

#1 Feared Predator

The fearsome PEREGRINE FALCON feeds on smaller birds, including pigeons, gulls, sparrows, swallows, and starlings.

Falcons are found worldwide and attack with terrifying dives at speeds up to 200 mph, tearing into the victim bird with lethal sharp beak and talons.

High-visibility scare strikes instant terror with:

- Sparkling Mirror-Backed Eyes
- Reflective Markings
- Realistic Design

When pest birds think a falcon is near, they don't stick around!

Instructions & Specifications: For added stability, fill base with sand or gravel via removable plug or mount on 1.5" diameter pole. For best results, relocate regularly. Maintaining the elements of change and surprise is key to effective deployment of visual scare devices of any kind.
16" Tall x 7" Deep x 7" Wide
