**DIRECTIONS FOR USE**

**Summit**® ... *responsible solutions*®

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**DO NOT USE ON CATS**

**SHAKE WELL BEFORE USE.**

Do not transfer to another container.

**CLOTHING:**

To repel and kill mosquitoes, chiggers, mites, and Ticks, including Deer Ticks that carry Lyme disease and Rocky Mountain spotted fever.

**This product should be applied directly to clothing, outdoor gear, and shoes and allowed to dry prior to wearing or prior to using in the field. This product must not be applied to clothing while it is being worn. Under no circumstances should this product be applied directly to humans.**

- Do not spray directly on or otherwise allow to come into contact with skin, face, or eyes.
- This product is intended to be used on clothing and exterior gear only, such as backpacks, parkas, tents, or bed nets.
- Make all applications outdoors in a well ventilated area.

**For up to six week protection against Ticks, Chiggers, mites, and mosquitoes** apply the product to articles outdoors under conditions free from wind.

- Spray outer surfaces only, while either hanging or on a flat surface. Use a sweeping motion to ensure the entire surface of the fabric is covered maintaining a distance of 6-8 inches from the surface of the fabric.
- Treat the front, back, and sides of the outfit or other outdoor textile and allow to dry for at least 2 hours. It is important to concentrate on areas the pest may seek to enter your clothing such as socks, bottoms of trousers, and cuffs. You may repeat these directions after six weeks of use.

**One 32 ounce bottle will treat 7 full outfits.**

Use 4.5 ounces per outfit, approximately 1/7th of the bottle. The treatment should wet the fabric enough to notice a color change as if the article was wet with water.

It has been shown through field experience that further tick and flea prevention can be achieved by sealing the bottoms of trousers using tape or by tucking into socks. For further protection, use in conjunction with an USEPA approved insect repellent registered for direct application to the skin and utilize the following primary preventive measures. Avoid walking in areas where the pests are found, wear appropriate protective clothing (light-colored, long-sleeved shirt and long pants tucked into socks) and inspect body daily for ticks.

**MOSQUITO NETS, TENTS, SLEEPING BAGS, BACKPACKS, SCREENS, CAMPING LOUNGES, SLEEPING PADS AND TENT FOOTPRINTS:**

- Only treat outsides of products.
- Do not treat surfaces which come in direct contact with skin. Spray outdoors or in a well ventilated area when wind is calm.
- Either hang or lay out gear so areas to be treated are easily accessible. Spray maintaining a distance of 6-8 inches and treat all exterior areas of fabric.
- Continue spraying until surfaces are moist and allow at least 2 hours to dry prior to use.
- Do not treat more than once every six weeks.

**STORAGE AND DISPOSAL**

**Do not contaminate water, food, or feed by storage or disposal of this product.**

**STORAGE:** Store in a cool, dry place. Do not store near heat or open flame.

**DISPOSAL if empty:** Do not reuse this container. Place in trash or offer for recycling, if available.

**If partly filled:** Do not pour or dispose down-the-drain or sewer. Call your local solid waste Agency for local disposal options
