Professional Insect Light Trap (ILT) Systems

HIGH QUALITY SYSTEMS UTILIZING ADVANCED GLUE BOARD TECHNOLOGY IN ULTRA SLIM-LINE DESIGNS

- Shatter Resistant Quantum BL lamps for maximum attraction and safety in glass-free zones.
- Large full-size glue boards are conveniently interchangeable with the Mantis range. One glue board fits all open systems. Specialty UV resistant glues capture the smallest to large insects intact for easy identification.
- Glue Board options include; Classic premium full size (black), Universal boards (in discreet black or High Definition [HD] white) that also fit competitors traps, Gray Matrix boards for sensitive accounts and density counts or HACCP audits, recyclable premium plastic boards retards mold for high moisture areas and extra long life. See also page 12 & 13 for more information.
- All PestWest systems are manufactured with long-lasting low mercury (Hg), lead-free, Quantum BL lamps uniquely designed for maximum efficacy.
- Stainless steel products are perfect for sensitive areas such as; food handling, processing and medical facilities.
- Easy to remove bottom tray and drop down front chrome guard for no tool quick and easy service
- Patented Reflectobak™ sleeves for maximum catch and increased attractiveness to insects. Significantly slows the drying of the glue board
- All metal construction means longer lasting systems for YEARS of reliable service

Mantis® 1x2

The Mantis Professional ILT comes manufactured with highest grade **shatter resistant lamps** for extra protection in glass-free zones. Standard lamps are available as an option. Portable (with optional stand) and ideal for use in food preparation areas and a variety of other sensitive areas. Attractive, ultra-slim, compact and unobtrusive wall-mounted system.

- 30 watts of Quantum power give 180° coverage and optimum performance
- Durable white powder-coated zinc steel or brushed stainless steel for long life
- Available in 110v and 220v

	H: 12½" W: 19" D: 2½"		10lb	Finish: <input type="checkbox"/> White <input type="checkbox"/> Stainless Steel

MAN2X2016 (old MNT014)	White	30	Each	16 lbs
MAN2X2004 (old MNT024)	White – 220v	30	Each	17½ lbs

Optional cover replaces the chrome grill on the 1x2, 2x2 and MAX (sold separately)

Replacement lamp(s): TUB15W490 - shatter resistant (old MNT006) and TUB15W430 (old MNT007).

Replacement Classic Premium glue board BLACK BOACHA850, BOAMAN853 (Universal BLACK), BOAMANWT (Universal WHITE), BOAMAN867 (Gray Matrix), BOAMAN872 (plastic)

NOTE

When ordering a 220v system, not all plugs are the same. Please consult with a PestWest representative when ordering to ensure we enclose the right plug configuration for you.

shown with optional chrome stand product code EF30STAND (old MNT055)

HELPFUL HINTS

To get versatility out of our traps, use a Demi-Diamond pheromone glue board on top of the Mantis glue boards. Edge-to-edge glue so you don't lose any capture surface area, you add value and have a multifunctional trap! See the Demi Diamond section on page 16 for details.

Questions? call 866.476.7378 or log on to: www.pestwest.com/us

Mantis 1x2 MAX50

The attractive, ultra-slim Mantis® 1x2 MAX50 combines 50 watts of power for more attraction to target flying insects, ideal for sensitive areas and for high insect density environments.

- Two 25-watt high-powered Quantum long-lasting **shatter resistant lamps** – extra protection in 'glass-free' zones
- Advanced energy efficient electronic ballast system reduces running costs and increases energy savings
- Electronic ballast eliminates the need for starter replacement – less maintenance
- Glue boards are interchangeable with other Mantis® systems
- Comes complete with gray grid matrix glue board for density counts and HACCP audits

	H: 12½" W: 19" D: 2½"		10lb	Finish: Gray
	Wall-mounted		Freestanding	3-YEAR WARRANTY

MAN12M056	Silver powder-coat zinc steel	1500	60	3/case	33 lbs

Replacement lamp(s): TUB25W490 (shatter resistant) and TUB25W430 (standard).

Replacement Classic Premium glue board BLACK BOACHA850, BOAMAN853 (Universal BLACK), BOAMANWT (Universal WHITE), BOAMAN867 (Gray Matrix), BOAMAN872 (premium plastic)

*Optional chrome stand available to add portability. EF30STAND (old MNT055)

**NOTE: For added value and convenience, our premium glue boards are interchangeable with most all Mantis products, minimizing stocking requirements and investment and maximizing performance.

shown with optional chrome stand product code EF30STAND (old MNT055)

Universal glue boards available in black & white see pages 12 & 13 for details

Mantis® VEGA

The rising star of ILT innovation, the Mantis Vega maximizes environmental quality featuring 3 energy efficient T5, 14 watt Quantum **shatter resistant lamps** and ultra modern electronic ballasts. Interchangeable glue board with other Mantis brand products. Continually raising the bar on quality without compromise.

- Can be hung vertical or horizontal
- Unique ultra narrow slimline design
- ROHS compliant T5 tubes have a higher UVA output with less electricity consumed compared to T8 tubes
- Lead (Pb)-free, low Mercury (Hg) and reduced glass content.
- State-of-the-art dual voltage ballast significantly reduces electrical consumption
- Interchangeable glue board with most other Mantis brands
- 3 year warranty

	H: 11.8" W: 22.6" D: 1.6"		7lb	Finish: Gray or Stainless Steel

CHAVGA124	Mantis Vega 220 volt Euro Plug	3000		EACH	12.0 lbs

Replacement lamp(s): TUB14W471 (shatter resistant)

Replacement glue board: BOACHA850 (premium), BOAMAN853 (Universal BLACK), BOAMANWT (Universal WHITE), BOAMAN867 (Gray Matrix).

Optional chrome stand product code EF30STAND (old MNT055)

WHITE DISCRETION COVERS

So you don't want to see inside the Mantis 1x2 or 2x2 because the placement is in a public area. The discretion cover is an option to make any 1x2 or 2x2 a discreet insect light trap suitable for any public area.

- Available for 2012 manufactured systems only. Contact us for details.
- Retro fits easily with no additional tool required.
- The discretion cover will fit the 1x2MAX however will not match color scheme.

See below for easy install instructions:

Product code	# per pallet	Net unit	Shipping weight
MEF301X2COVWH	N/A	Each	3 lbs

Always unplug system before attempting any maintenance or retro fit.

Carefully remove the front grill by slightly bending the tabs at the base of the grill outward from the punched holes and pull away.

Reverse the action with the new discretion cover.

Your new 1x2 discretion is ready to go to work.

Same procedure for the Mantis 2x2

Discreet Flying Insect Management

UNIQUE & DECORATIVE SOLUTIONS

To compliment the PestWest range of professional flying insect management products, these systems have been designed specifically for areas where fly control should be hidden from view. Their unique and decorative front covers hide the glue board and insect catch, providing discreet and environmentally friendly fly control, ideal for domestic and front-of-house applications.

These systems are manufactured with standard (non-shatter resistant) lamps, since they are typically in front of house applications and/or non regulated as in food handling areas. Shatter resistant lamps are readily available as an optional item. This excludes the On-Top-Pro 2 which includes shatter resistant lamps. Ideal for use in restaurants, hotels, dining rooms, hospitals and all public areas where flying insect management should be hidden from view.

The private labeling aspect personalizes the systems even further to your unique aesthetic requirements.

Mantis® Uplight

Attractive and stylish wall mounted unit: the perfect choice for public areas where flying insect management needs to be discreet e.g. restaurants and front-of-house. Disguised as a wall sconce with a full-size glue board, and a 15-watt Quantum lamp that is hidden from view. Front cover can be painted, wall papered, or decorated to match existing decor. Lamps are interchangeable with other PestWest systems.

	H: 8¾" W: 18½" D: 8¾"		8lb	Finish: Magnolia

Discreet Flying Insect Management

Ultra discreet products are virtually invisible. These products are so discreet that patrons in restaurants (and most employees) don't even have a clue this is an insect light trapping system. They blend into the environment so well, you may even forget they're there.

The no-zap, no fallout designs utilize supreme Quantum technology to ensure the no nonsense attraction to these traps. No chemicals or additional synthesized attractants are used to assist in LEED sustainable buildings.

The unique, "why didn't I think of that" designs, are complex and highly effective in managing photo positive insects.

The polished aluminum cover of the Pro VS will reflect the decor colors in any establishment with light gray end caps so it matches every time.

The OTP2 fits perfectly in an overhead ceiling tile disguised as a normal ceiling light. Fools 'em every time.

MIRAGE PRO VS

High-powered, yet discreet glue trap system providing decorative and attractive fly management for areas where the catch should remain unseen. Utilizing two powerful 25-watt Quantum BL lamps (50-watts) and advanced glue board technology for the Mirage PRO VS gives maximum protection. Light weight and designed to sit close to the wall blending into most settings, the system can be wall-mounted horizontally or vertically. Glueboards are interchangeable with other PestWest systems, lamps are interchangeable with On Top Pro 2 and Mantis MAX!

	H: 20" W: 12" D: 5 1/4"		7 1/2 lb	Finish: Satin aluminum and polished stainless steel front
	Wall-mounted vertical or horizontal	3-YEAR WARRANTY

MIRPV5044 (220v Euro)	Aluminum	750	45	Each	11 lbs (special order)

Replacement lamp(s): TUB25W490 (shatter resistant) and TUB25W430 (standard)

Replacement glue board: BOACHA850 (standard), BOAMAN853 (Universal Black) and BOAMANWT (Universal white)

ON-TOP PRO2

When it comes to discreet systems, the On-Top Pro2 is head and shoulders above the rest! Uniquely designed to fit discreetly and easily into new or existing suspended-ceilings. The On-Top Pro2 is ideal for use in supermarkets, fast food, offices, and convenience stores where wall space limitations may have previously made placing a wall mounted system difficult. The unique unit can be placed above aisles and will control infestations in public spaces as well as in the loft/ceiling areas where allowed. Patented design provides 360° protection and fits ceilings with 24" x 24" tiles. The system utilizes two powerful 25-watt Quantum BL **shatter resistant lamps** (50 watts) and one full-size PestWest glue board. Lamps are interchangeable with the Mantis MAX 50 and the Mirage Pro VS. Glue boards are interchangeable with most all other Mantis systems. Includes a 24" T-cross bar for easy retrofit of 48" tiles. May have to be hard wired depending on city/county codes. Consult with a licensed electrician for details in your area.

	H: 23 3/4" W: 23 3/4" D: 5"		12.1 lb	Finish: Zintec steel body with brushed aluminum cover tray

BOAMAN867 (Gray Matrix), BOAMAN872 (premium plastic)

HELPFUL HINT

PestWest is the leader in being ahead of the regulatory curve. Co-engineering the long lasting Quantum brand lamps and using them as our standard for many years exceeds the strict regulations controlling the amount of mercury (Hg) and lead used in manufacturing. Today, the standard 350 BL lamps are being phased out in many countries. In time, the US will follow.

Professional Insect Electrocutors

ULTIMATE, NO-COMPROMISE FLYING INSECT MANAGEMENT FOR THE STRICTEST STANDARDS IN THE INDUSTRY.

- Unique transformer – reduces shattering of insects
- Tool-free guard opening – for easy service
- 'Power-on' and 'grid-on' warning lights – inspection at a distance
- Catch tray with draft deflector – keeps dead insects within the system
- Spring-loaded electrocution grid – easy cleaning
- Wrap around guard – 360 degree protection
- Low mercury (Hg), lead free, long life Quantum BL lamps for maximum attraction
- Choice of mounting option for ease of placement
- 3-year PestWest warranty (excludes lamps)
- Maintenance shut off switch for user safety
- For use in non-food production areas where high populations of insects are present

Nemesis® CM (CORNER MOUNT)

Versatile, yet compact, this low profile corner mounted system offers highly reliable and effective flying insect management for all areas where space is at a premium. Two high-powered 40-watt (80-watts) Quantum BL **shatter resistant lamps**. Lamps are interchangeable with other PestWest systems. The electronic ballast means lower operating costs and no starters to replace.

NOTE: insects must go **through** the electrocution grid before they reach the highly attractive UVA lamps. A feature (and benefit) not offered by other competitive models.

- Extra large strategically positioned power grid – insects must fly through the grid to get to the light
- Removable spring-loaded power grid – quick and easy to clean and service

Nemesis® QUATTRO

The Nemesis Quattro combines energy efficiency with the power to get the job done. The unique Quantum T5 lamps provide more output in a slimmer design so large industrial areas are no problem. The Nemesis Quattro features energy efficient PestWest Quantum T5 14-watt UVA lamps powered by a state-of-the-art electronic ballast for flying insect management and very low operating costs.

- Comes with a wall mounting bracket
- All metal or stainless steel construction
- ROHS compliant T5 tubes have a higher UVA output with less electricity consumed compared to T8 tubes
- Quick, easy and tool-free maintenance
- 3 year guarantee
- Easy to see operational lights (power on and grid activated) from ground level
- Shatter resistant Quantum lamps for lead-free, low mercury (Hg) and glass-free zones

Commercial Systems

POWERFUL, ECONOMICAL AND COMPACT

Designed with both the pest management professional and the budget minded end user in mind, the commercial range of flying insect management systems are so powerful and compact, offering protection far and above their size. Tool-free maintenance with a choice of either wall-mounted, ceiling-suspended or freestanding options; these systems are ideal for smaller facilities, shops or even for domestic use. Additional design features mean that the commercial systems stand head and shoulders above the others.

PestWest designed these commercial grade systems to outlast and outperform the competition. Durable components and quality construction make these the most reliable systems in the market today.

Specialty Range

NOT EVERYONE WHO NEEDS FLYING INSECT MANAGEMENT HAS THE SAME REQUIREMENTS

Which flying insect management system would you expect to find in a rhinoceros pen at a zoo, or a booth on a toll road, a flour mill, a pharmaceutical manufacturing plant or any other specialty areas? This and many other requirements have been fulfilled by PestWest experts, using a range of specially developed systems for very unique and sensitive environments. Whether you require splash-proof, draft-proof or dust explosion-proof systems – PestWest has a system to suit and are always ready to advise and help you, on site, customizing your facility if necessary.

Questions? call 866.476.7378 or log on to: www.pestwest.com/us

Mantis® 4x4

Extra large capacity glue board (non-zap) system for open industrial areas which are not explosion-proof rated. Ceiling-suspended with four 40-watt Quantum BL **shatter resistant lamps** (160-watts) backed by Reflectobakt® sleeves to increase attractiveness to insects. Advanced electronic ballast for lower running costs.

Double-sided glue board provides over 926 square inches of protection.

Glue board system

Mantis® 4x4EX

Extra large capacity glue board (non-zap) system for use in areas where potential for explosion from dust or powders exists e.g. sugar processing factories and flour areas. The Mantis 4x4EX system meets all FDA, USDA and European Food and Safety Legislation requirements. The Mantis 4x4EX is unique, it satisfies the requirements of UL 1559 and has European safety standard EN60335-2-59 for insect control equipment. Additionally it carries an IP65 rating and has been independently tested for compliance to Euro-norm PREN 50281-1-1 for potentially explosive atmospheres and satisfies all current EMC standards and **NEC Division Code Class II, Division II**. The Mantis 4x4EX is also suitable for Zone 22 areas, satisfying EN 50014:1994. In bulk handling areas, this system is ideal for safety and efficacy, trapping even the smallest insects. The suspended system has four powerful 40-watt Quantum BL **shatter resistant lamps** coated with a fluoropolymer (160-watts) backed by Reflectobakt® sleeves to increase attractiveness to insects and extends glue board life. Advanced electronic ballast system reduces the running costs and helps to increase the efficiency. Hard wiring required - consult a certified electrician for installation.

Double-sided glue board provides over 926 square inches of protection.

Insect Electrocutor

Passive Flying Insect Mangement

The Florida Fly Baiter is a Unique system to be used with Maxforce™ Fly Spot bait. This outdoor system is great for areas where the house flies have been known to congregate or be a health hazard. Light assembly required, and lasts for many months. The most cost effective and versatile flying insect management system available today. No electricity needed and the application is only limited to the insecticide label. The 2.8 oz triangle tray further enhances the attraction by adding your favorite granule, liquid or gel. The combination is a great IPM tool and is a lethal combination for any flying insect management program.

Contact us directly if you have a more specific need at **866.476.7378** or via email at **info@pestwest.com**

A unique and powerful resource against the most cosmopolitan of all the flies, **the house fly.**

Using patented color attraction technology by extensive University and Department of Defense research, designed and constructed by the flying insect experts at PestWest Flying Insect Science in partnership with Bayer Environmental Science, the Florida Fly Baiter is a rock solid arsenal in any fly management program.

No electricity required, simply assemble the blue panels as shown, hang in the problem area, spray a small amount of the Maxforce Fly Spot with the spray bottle (enclosed) and your done! Use the nylon cords to hang overhead or use the included hook & loop tabs to affix to a surface for stationary out-of-the-way applications.

For use in outdoor areas around dumpsters, schools, clubs, restaurants and theme parks, dining areas, camp sites, kennels, poultry houses, recreational areas, horse barns, landfills, dairies, or anywhere flies tend to congregate and are a nuisance or a health hazard.

To be used with Maxforce Fly Spot Bait sold separately

KIT INCLUDES:

- 5 - Fly-Baiter systems
- 5 - tie lines and securing discs
- 1 - dosing spoon
- 1 - 2fl oz spray applicator bottle
- 5 hook & loop fastener sets (for non-porous surfaces)
- 5 triangular 2.8 oz (82.8ml) bait trays (for granular, liquid or gel baits)
- Complete directions for use

Glue Boards

NOT ALL GLUE BOARDS ARE THE SAME

PestWest boards are double-sealed, front and back, to protect against moisture absorption, in steamy or high moisture environments such as kitchens etc. This avoids the problem of the board warping with time. As a special glue is used on the PestWest boards, the glue stays on the board and not on your hands or clothes, if accidentally touched. Other cheaper, inferior boards often have wet glues that can be very messy to handle. While wet glues appear very sticky to the touch, many of them form a very thin hard skin on the glue surface when in contact with air or UV light. This can prevent small insects from being trapped. And that's just the glue. We at PestWest have done extensive research to develop the high quality boards as they are today. Warping, moisture absorption/retardant, card matrix type, mold resistance, UV resistant glue type and the Universal boards that fit a wide variety of insect light trapping systems on the market today. All of which have been thought through and field tested with the average life of 60+ days in all Mantis brands, which is the reason these are packaged in 6-packs, not 12. This means lower investments on your part in both inventory and labor costs.

GLUE BOARDS AND REFLECTOBAKT® SLEEVES

Over the years, the industry has used black as a standard color for their boards to conceal the catch. However as pest management evolved into a more sophisticated science the needs have changed and so have the board matrix types.

Add the small Demi-Diamond Indian meal moth or clothes moth pheromone sticky boards onto any PestWest ILT board for a multifunctional trapping system.

The effectiveness of the PestWest professional insect light traps are greatly increased due to two main features:

- **Classic premium glue boards** (BOACHA850) offer some of the largest catch surface areas in the marketplace, enabling a greater catch per board while combining the versatility of a board that can be easily adjusted to fit the desired system
- The glue boards are positioned so that they sit closer to the UV tube than other models, providing a more rapid catch and an exceptionally slimmer system.
- **Universal glue boards** 60-day (unless filled with insects) are available in black (BOAMAN853) or white (BOAMANWT) and fit a wide variety of insect light traps in the market. See enclosed cross reference chart for complete reference.
- **Gray grid matrix glue boards** product code: BOAMAN867 for easy insect counting and monitoring. Boards can be retained to provide an accurate record for HACCP audits
- **Premium plastic glue boards** BOAMAN872 (plastic) glue boards inhibit mold and ideal for high moisture areas
- Extra large, 926 square inch (23 3/4" x 19 1/2" x 2-sided) glue boards (BOA4X4880) for the **Mantis 4x4** system for extra protection

Thin designs and longer lasting glue boards are made possible thanks to the **Reflectobakt®** (see page 13) sleeve available in T8 (1") MREFT8 and T12 (1 1/2") MREFT12. This sleeve shields the full-sized glue board from the drying effect of the UV light, thus making the systems more effective for longer periods of time.

HELPFUL HINT

To get versatility out of our traps, use a Demi-Diamond pheromone glue board on top of the Mantis glue boards. You don't lose any capture surface area AND you add value and have a multifunctional trap! See the Demi Diamond section on page 16 for details.

GLUE BOARDS FOR INSECT LIGHT TRAPS

Product	Product code	Overall board dimensions	Perforations	Case / net unit	Case shipping weight

Replacement Universal Glue Boards for Insect Light Systems

NOT ALL GLUE BOARDS ARE THE SAME

The PestWest® Universal Glue Boards are available in both discreet black (Product code: BOAMAN853) and "high definition" white (Product code: BOAMANWT) and have been used in a wide variety of applications even OUTSIDE of the light trap. Used around homes and restaurants as an insect monitor, around plumbing monitoring insect access spots (scorpions, brown recluse, etc) captures small invasive vertebrates, among many other uses. Certainly the preferred board for all non-chemical applications and is your watch dog when you're not on the scene.

Directions for use are in English and Spanish.

Replacement Lamps for Insect Light Systems

SEE THE LIGHT - FAR STRONGER - LASTS LONGER! **COMBINING SCIENCE AND TECHNOLOGY!**

To optimize the efficiency of PestWest systems, Quantum BL extended life lamps are used in all our professional fly management systems. Not only are these lamps state-of-the-art, but they are at the zenith of UV technology for increasing Pulling Power. Designed to work at the specific wavelength that is proven to be most attractive to flying insects.

PestWest lamps are built to conform with the strict regulations which control the amount of mercury and lead used in the manufacturing of the tube, making them some of the lowest mercury bearing UV lamps on the market. The unique phosphor-mix does not require the hazardous material lead, to improve its performance. That coupled with other constructional techniques results in the Quantum BL UV tube being totally lead-free and way ahead of the regulatory curve.

QUANTUM BRAND LAMPS FROM PESTWEST - SIMPLY THE BETTER LIGHT SOURCE

Using flying insect management systems manufactured with genuine Quantum BL shatter resistant lamps with FEP fluoropolymer coating ensures the easiest and safest solution by significantly reducing the risks of contamination from glass breakages.

UV light is invisible to the human eye. Just because a lamp in a flying insect management system appears lit, you cannot assume that it is emitting enough UV light to attract flying insects. Thanks to water based phosphor technology the new PestWest Quantum BL bulb has been developed to concentrate energy distribution around the peak of 365 nanometers wavelength. This is highly attractive to flying insects and shows 100% improvement in effectiveness. Degradation of UVA is also significantly reduced resulting in a 40% increase in output over other standard BL 350 UVA bulbs.

UPGRADE YOUR PROTECTION

- Ultimate performance – maximum attraction 40% more powerful and 100% more effective than standard BL 350 UV lamps
- Maximum output and minimum reduction in UVA light output over two years
- Our coating will not discolor, melt or flake throughout the life of the tube
- Maximum UV transmission for better attraction performance and reduced light loss
- Quantum lamps are 100% lead free

PestWest believes that we owe it to our customers to supply them with the best.

For more information on the Quantum lamps scan this QR code or log on to: www.pestwestordering.com/battleofthebulbs
BL 350s, Philips Master lamps are also available.

We use the highest quality shatter resistant material for your protection and maximum insect attraction.

PLEASE NOTE:
The band on the linear lamp denotes shatter resistance

Inspection and Auditing Tools

PESTWEST INSPECTION AND AUDITING TOOLS ARE EASY TO USE
AND GIVE YOU ACCURATE RESULTS YOU CAN TRUST

The PestWest inspection and monitoring systems give you the practical information you need to perform pest management data collection at a whole new level. Like computers can be either a useful business tool or a dust collecting door stop, IPM tools are only as good as the technician using them. These tools provide the technician the tools to be much more effective in their inspections, thus reducing labor costs, more precise data collection and adding overall value to the account.

ADD YOUR OWN BAR CODE FOR
TRACKING OR A COMPANY LABEL
TO PERSONALIZE THE MONITORS

DEMI DIAMOND & PHEROMONES

Small flying insect monitoring system

- DISCREET and reusable monitoring station to attract and capture target insects e.g. Fruit fly (*Drosophila*) among many others
- Glue board technology for easy identification and MONITORING
- PestWest brand slow release pheromone glue pads available - excellent at controlling Indian meal moth (*Esphestia/Plodia*) and clothes moth (*Tineola/Bisselliella*) in convenient pocket sized sachet packs
- Can be wall-mounted or stood upright on a flat surface, underneath bar tops for ONE GLANCE monitoring
- Small reservoir (3ml) at the bottom of the monitor means a variety of attractants of your choice can be added to maximize the monitor
- Demi-Diamond Boards can be retained to provide an accurate record of infestation levels and insect types for HACCP audits
- Ideal for supermarkets, pet stores, restaurants, homes, delis, convenience stores and many more
- **COMBO Pak** - 10 stations, 50 replacement glue boards for easy inventory management and economy

PestWest UV-AMETER

UV lamps stop producing UV light long before their blue visible light declines – users can't tell by looking at them!

The PestWest UV-A Meter is easy to use, enabling you to monitor the condition and quality of UV tubes in any electronic flying insect light system so that you get the best results. Making the pocket size UV-A Meter the perfect tool in any toolbox.

Measures ambient light first, then accurately measures true UVA direct from your system. Great for new accounts that have existing systems (who knows when the lamps were changed last?) and monitoring systems throughout the year.

Standard UV lamps need to be changed annually however this may be more frequent if exposed to sensitive areas or natural sunlight.

Product	Product code	Net unit	Shipping weight
UV-A Meter	UVAMETMKII	Each	3.5 oz

Inspection and Auditing Tools

The Universal/Interception monitor is the perfect choice to census for many insects. Add your bait of choice for the target insect where allowed to maximize monitoring for cockroaches. The bait and the corrugated board are highly attractive to cockroaches. Great for silverfish and many more.

When used as a bed bug monitoring tool it is an inexpensive zone monitor that allows continuous monitoring for bed bug activity. Not to be used as a stand alone monitor, but one tool of several that provides an attractive harborage for bed bugs, while being discreet for installation anywhere bed bugs are suspected at critical interception zones between the bug(s) and the host. The interlocking between the design allows the use of multiple zone monitors in tandem. Use one for discreet areas, interlock two for around bed posts and side tables, 3-4 for larger areas or lengthwise under a head board or picture frame.

The KIT and the Interception Zone Monitors are NOT the silver bullet for the capture or control of bed bugs, however ARE a critical tool in every IPM kit for Bed Bug Management. The tools are only as good as the user, and given there are so many bed bug seminars available today, the opportunity is high to put this gained knowledge into practice.

BED BUG DETECTION KIT

To maximize the benefit of this bed bug inspection system, it's important to know what you're looking at (and for). Proteins from undigested blood, caste skins and eggs will fluoresce. Using the orange filter goggles in combination with the intensive 455 nm light, adds vivid contrast to your inspection. This kit enables the user to add a new dimension to bed bug inspections to intensify the inspection process and making good use your time. The blue-light-emitting light sources used to visualize latent signs and other physical infestation evidence, it is necessary for the examiner to wear orange goggles which are included in the kit. Darken the room or area, shine the light at various surfaces where physical evidence might be found. Document and collect the specimens. The blue LED flashlight is made of Aerospace-grade aluminum tempered Pyrex Lens; w/ Mil-Spec Type III hard-anodized, Weight (with battery) 8.7 ounces with an estimated life of the batteries is 300 hours without a significant decrease in power output. The estimated lifetime of the LEDs is about 11 years. The flashlight has been shock tested with a drop test of ten feet.

Kit includes:

- One (1) blue high intensity rechargeable flashlight
- One (1) pair of orange filter premium goggles
- One (1) pair of needle nose forceps
- Three (3) specimen 4x magnifiers
- Four (4) Interception Zone Monitors
- Live hinge carrying case

Replacement components are readily available.

UNIVERSAL/INTERCEPTION ZONE MONITORS

The Universal/Interception zone monitor consists of pieces of corrugated card, presented in such a way as to facilitate the entry of bed bugs among other insects. The light sticky inner surface for capturing adult stages. A peel-off sticky tape on the back side helps to secure them to each other (interlocking) or to a surface.

It is recommended that the Universal Monitor is placed in areas where bed bugs are likely to be present, such as behind bed headboards, desks, sofas, side tables, around bed frame legs, on the sides of mattresses, baseboards, picture frames, luggage, among many more.

Since there's no attractant (available yet) the Interception Zone Monitors are designed to be used between the harborage of the bug and the host.

Want to use them for monitoring another pest? Add your bait of choice for the target insect where allowed. Add your favorite gel bait to maximize monitoring for cockroaches. The bait and the corrugated board are highly attractive to cockroaches. Great for silverfish and many more.

Exodus ULV System

THE TOTAL SPACE SPRAYING SOLUTION FOR ANY PEST MANAGEMENT, DISINFECTION AND DEODORIZING PROGRAMS WITH (OR WITHOUT) A UNIQUE PROGRAMMABLE TIMER

The PestWest inspection and monitoring systems give you the practical information you need to perform pest management data collection at a whole new level. Like computers can be either a useful business tool or a dust collecting door stop, IPM tools are only as good as the technician using them. These tools provide the technician the tools to be much more effective in their inspections, thus reducing labor costs, more precise data collection and adding overall value to the account.

FOR A LIMITED TIME, COMES WITH A 34 OZ. (1000ML) REFILLABLE BOTTLE. WHILE SUPPLIES LAST.

Questions? call 866.476.7378 or log on to: www.pestwest.com/us

What is ULV?

The World Health Organization defines ULV, as follows: "Ultra Low Volume spraying utilizes the minimum volume of insecticidal formulation required to produce the desired biological effect with maximum economy using special formulations, applied through dedicated application equipment, ULV programs achieve this."

How does ULV work?

Liquids are passed through a specially designed unit, which generates an airborne mist of droplets. These droplets diffuse through the treated area and settle out onto surfaces, meaning that the material used will be active both as a space spray and a surface spray. The key to successful use of ULV is the production of an optimum size of spray droplet. It must be small enough to remain airborne without being too small to hit the target – research has shown the optimum droplet size to be around 15 microns.

Conventional space spray equipment produce large droplets (over 80 microns) that quickly fall out of the air and carry a high concentration of liquid that often leaves a visible residue or unpleasant odor.

The majority of droplets in a thermal fog are too small (less than 5 microns) to impinge upon the target (being unable to overcome the 'air curtain' around it).

These smaller droplets at 15 microns are able to be carried on air currents into small cracks and crevices that are hard to reach using conventional treatments, yet still heavy enough to settle, so that treated areas can be re-entered with the minimum of delay.

The range of areas for ULV application is huge, such as:

- Domestic, hospitals, prisons, hotels, offices, schools, colleges, cinemas, theatres, police stations, factories, libraries etc
- Domestic and commercial kitchens
- Waste sites, incinerator plants, sewage plants, man holes and underground sewer pipes
- Ships' holds and cabins, cars, tractor trailers, vans, trains, buses, freight containers, ambulances, police cars, hangars, dock buildings, aircraft
- Silos, factories, warehouses, dairies
- Zoos, kennels, catteries, aviaries, dog warden vehicles, animal sanctuaries, ASPCA premises, pet shops
- Farms, including: animal husbandry e.g.: poultry houses, swine houses, etc
- For insect management, odor control, mold management, disinfectants, poultry vaccine applications

Bio-Gel Cleaning Products

BIOLOGICAL CLEANING SANITATION PROGRAM

Bio-Gel is a range of biological cleaning products that are non-insecticidal, biodegradable and non-toxic compounds that contain no pathogens, are non-caustic, non-corrosive and salmonella-free utilizing natural materials.

Put billions of microbes to work. Bio-Gel brand cleaning products focus on greases, fats, oils, proteins and carbohydrates and leave behind a fresh clean scent. Great for drains, mops, or dumpsters, you choose the formulation that's right for you. Highly effective in any sustainable cleaning program.

Questions? call 866.476.7378 or log on to: www.pestwest.com/us

BIO-GEL

Superior hard surface, non-insecticidal multi purpose cleaner

- Superior, high sheer cling (thickened) formulation to adhere to active drains which makes it harder to flow out of the system
- Chlorine, Ammonia and pesticide resistant formulation
- Begins to immediately digest inanimate organic debris
- Fresh citrus scent

Mix 1:1 (water) and trigger spray or foam. See full label for directions. Use this product in active drains, toilets, holding tanks, grease traps, septic systems, where higher level degradation is required. Bacteria split every 20 minutes and digest the organic debris that cause odors.

Available in 1 32 oz. quart, 128 oz gallon jug, 6 gallon pails and 55 gallon drums

Product code	Net unit	Shipping weight
BIOGEL900 (old MNT100)	12 quart/case	29 lbs
BIOGEL902 (old MNT105)	4 gal/case	37 lbs
BIOGEL901 (old MNT106)	6 gal pail	53 lbs
BIOGEL55	55 US Gal Drum	480 lbs

AUTOMATED INLINE INJECTION PUMP SYSTEM

You can set the timer on either to dose to your requirement for Bio-Gel and you program it for any amount of run time for any given period. Secured by a key (2) to help prevent any tampering. Field-proven drain and odor control chemical dispensing systems. The Bio-Gel Pro Series Automatic Inline Injection systems are known for their reliability and durability in the field and are backed by a solid two-year warranty. The 110-Volt Bio-Gel is the most reliable dispenser in the industry for bio in-line and grease trap maintenance. Ideal for restaurants, hospitals, cafes, bars, supermarkets, universities, schools, offices and more.

BIO-GEL PRO KLEEN

- Advanced non-insecticidal floor cleaner and mop water additive
- Advanced surfactants blended with superior microbial technology makes this product the preferred product for restaurants, hospitality, institutional, and industrial applications
- Simply add it to mop water bucket and let it go to work!
- Keeps mop heads fresher, longer
- Cleans organic debris build-up that causes foul odors.

This product can be ready to use, diluted and added to mop water

Available in 1 gallon (128 oz) jugs, 5 gal pails, 55 gallon drums

Product code	Net unit	Shipping weight
BIOGEL904	1 Gal - 4/cs	37 lbs Case
BIOGEL905	5 Gal pail	45 lbs Each
BIOGEL906	55 Gal Drum	480 lbs Each

MICROBLEND G

- Non-insecticidal Bio-Gel in a granular formulation
- Granulated for easy application in most any spreader or add 4 lbs of MB-G to 4 1/2 gal of warm water
- Microbial base product degrades inanimate organic mass
- Developed to reduce organic waste in barns, coups, stalls, houses, kennels, cages, litter, bedding, drain sewers, municipalities, towns and cities, waste water treatment
- Highly concentrated bacterial count
- Not sensitive to wide temperature variations
- Wide range of degradation capabilities
- Fresh citrus scent
- Aids in inanimate organic debris composting once wet

Product code	Net unit	Shipping weight
MICROBLEND 25	Each	28 lbs Each

SCENT SAVOR

Non-insecticidal, environmentally friendly ULV formulation that successfully neutralizes odors, including smoke, fish, animal, rodent, trash and sewer odors.

Scent Savor is a highly effective, high quality product, which successfully neutralizes odors without damaging the environment.

ULV application of this proprietary blend of essential oils utilizes the ideal droplet size with the minimum volume to impact the malodor molecule and neutralize it.

Great in Hotels, transportation, attics, basements, gymnasiums, locker rooms, restaurants, cruise ships, food and non-food areas, hospitals, schools and universities, governments facilities, office buildings and many more.

Available in 34 oz 1 gallon (128 oz) jugs

Product code	Net unit	Shipping weight
BIOSAVGAL	4 gal/case	34 lbs Case

PIDDLE PAL

Designed to eliminate urine, feces, blood, etc. stains & odors from cats, dogs and most others. GREAT as an value add-on for every flea treatment service offered by the PMP. Add a trigger sprayer if needed. works on pet bedding, carpets, automobiles, public toilets, assisted living facilities among many, many more.

- Flip top and ready to use. Non-insecticidal
- Fresh, clean scent
- NOT a masking agent, but microbes BIND to the molecule
- The ONLY product approved by the US Carpet & Rug Cleaning Institute
- A significant leave behind profit generator

Product code	Net unit	Shipping weight
PIDPQT	12 quart/case	28 lbs Case

Environmental Products: Rodent Control

REDUCING OUR IMPACT ON THE ENVIRONMENT WHILE INCREASING YOUR CONTROL

While we all strive to be environmentally responsible, there is often a compromise to be made regarding efficacy verses environmental pressures.

However, this is not the case with the AF Tire Baiter and Underground. These bait stations have been designed by experts to harness the power of the natural environments and the rodents own behavior, taking advantage of the desire for communal feeding by rodents, to achieve control quickly and effectively with as little impact on the environment as possible.

Questions? call 866.476.7378 or log on to: www.pestwest.com/us

AF UNDERGROUND

The AF Underground bait box brings together all the superb features associated with the AF Range but offers you versatility, security and discretion that no other rodent bait station offers.

The AF Underground enables the most natural environment for feeding, as the box should be buried in the ground and the inside can be lined with soil, creating a natural flooring, while up to four access points offer additional entrance and escape routes for rodents.

- Discreet box – designed to be a buried station, while the lid has the appearance of a drain cover
- Secure tamper resistant box, just add your own favorite bait
- Strong and resilient against environmental pressures
- Versatile – the length of the entrance tunnel can be adjusted to suit your needs
- All baits can be used with retaining bars supplied to secure block baits
- Box can be secured using ground anchors or can be cemented in place where the installation is intended to be permanent
- Designed to sit on gravel with holes in the base to assist drainage and therefore assist in keeping bait fresh
- Spring loaded aluminum lid to aid servicing
- 3.2 feet of pipe (1-meter) supplied with box. Additional pipe is available
- Discreet and secure for public areas ie. grass and shrubbery areas around shopping centers

Product code	Net unit	Shipping weight
AFUNDBOX	Each	22 lbs

AF TIRE-BAITER

The AF Tire-Baiter utilizes a used tire to create a natural feeding area and is ideal for achieving rodent control in areas where this may have been difficult previously, such as farms, dumpster or communal trash areas and landfill sites.

- Encourages communal 360 degree feeding
- Increases uptake of bait by providing a natural feeding area
- Protects bait from larger non-target animals
- Environmentally responsible design - Reusing old tires
- Maximum diameter of tire: 25.197 inch (tire not included)
- Slight elevation provides easy rodent access

Product code	Net unit	Shipping weight
TBAITERCOM	Each	7 lbs

Mad Hatter Lamp Recycling Box Program

THE MAD HATTER POLLUTION PREVENTION SERVICE – A COST-EFFECTIVE, RESPONSIBLE AND CONVENIENT WAY TO MAKE THE RECYCLING OF SMALLER QUANTITIES OF LAMP WASTE WHILE REMAINING COMPLIANT WITH REGULATIONS

DID YOU KNOW?

California and Massachusetts, have a regulation requiring HOMEOWNERS to recycle ALL fluorescent lamps. This includes small Compact Fluorescent Lamps (CFLs). Other states WILL follow.

Questions? call **866.476.7378** or log on to: www.lampcompactor.com

As a nation we know that Mercury is a toxic metal that is hazardous to both the environment and public health. There are well over 500,000,000 spent lamps thrown into the dumpster every year, not only is this illegal but it also causes more mercury contamination of the environment than any other consumer product.

Introducing the **MAD HATTER LAMP RECYCLING SERVICE** – a cost-effective and responsible pollution prevention service that is a simple to use box program, specifically designed to make recycling of your spent lamps easy.

The program ensures that smaller quantities of spent fluorescent lamps are sent for recycling in accordance with federal, state and local regulations.

- One price includes everything you need - saving you hundreds of dollars on your recycling costs
- Convenience for smaller quantities of lamps - this program will save you money
- Ideal for facilities with storage limitations - no need to wait for large quantities of lamps to build up
- Allows you to purchase recycling services based on your individual needs

A SINGLE 4' FLUORESCENT LAMP HAS THE POTENTIAL TO CONTAMINATE A 20-ACRE LAKE, WITH ITS MERCURY CONTENT BEYOND A SAFE LEVEL FOR DRINKING

With one call to **PestWest**, the Mad Hatter box designed specially for smaller quantities of lamps will be shipped to you to fill with spent lamps, this box comes complete with a return shipping label and complete instructions. Once the lamps are recycled a certificate of recycling will be mailed to you.

Product code	Product description	Net unit	Shipping weight
PWE002	(Medium box) 48" box (based on T8/24")	Each	3.5 lbs
PWE003	(Large Box) 12" x 12" x 48" Large box holds 146 approx (based on T8/24")	Each	4 lbs
PWE014	(For 8' lamps) Holds 15 T12 8' lamps	Each	4.5 lbs

Mercury is an essential component of fluorescent lights including 'Green Tip' and Compact Fluorescent (CFL) lamps - therefore all lamps must be managed correctly when they are removed from service

SPENT FLUORESCENT LAMP RECYCLING IS AS EASY AS 1-2-3

Battery Recycling Program

SAFE STORAGE, TRANSPORTATION AND DISPOSAL OF BATTERIES.

Battery waste is another growing problem in today's landfills. Lead seeping into ground water is a REAL problem and illegal in most states. PestWest can help eliminate that problem with a turn-key safe battery recycling program.

Questions? call 866.476.7378 or log on to: www.lampcompactor.com

PESTWEST DRY CELL BATTERY RECYCLING PROGRAM

All batteries can pose potential hazards during transportation and create extreme heat and in several cases, fires. Therefore, it is imperative that all batteries being shipped comply with the proper Department of Transportation (DOT) packaging requirements mandated January 1, 2010. The PestWest dry cell battery recycling program will ensure that any potential hazards are minimized while batteries are being accumulated as well as while the container is in transit.

All pails include electrical tape and prepaid return shipping label

FLUORESCENT LAMP COMPACTOR

Reduce the risks involved with storing used fluorescent tubes by disposing of them instantly and the hazardous mercury vapors contained within them!

The PestWest Vapor Vacuum Lamp Compactor is a waste collection and compacting system that can crush most any length of fluorescent tube and bulbs up to 6" in diameter while effectively recovering the hazardous mercury vapors.

State of the art, industrial grade filtration module and high output vacuum system - for effective and efficient processing of all types of fluorescent bulbs (including mercury vapor and high pressure sodium lamps).

- Mercury rated vacuum consists of modular canister construction and special optimum filtration system (patent pending).
- Unit is under total negative air pressure at all critical filtration points to ensure more efficient mercury extraction - safer for operator and environment.
- Charcoal canister is rated at between 3 and 4 million lamps and method of charcoal absorption is preferred for maximum filter life and efficiency.
- Unique, illuminated filter saturation indicator shows when filters require cleaning to insure optimum performance of the unit.
- Drum-fill indicator to show maximum capacity has been reached, reducing drum change requirements and saving money.

NOTE: This item is drop shipped to the final destination. Not available in every state

PestWest[®]
TRAINING

PESTWEST TRAINING MANUAL

HAVING THE RIGHT TOOLS FOR THE JOB STARTS WITH A SOLID EDUCATION,
FOLLOWED BY EXPERIENCE.

This updated training manual is packed with all the essential information for any pest management operation. Written by industry experts such as Dr Stuart Mitchell, this industry "must have" guide for every PMP's bookshelf is a full-color pictorially and text-based manual. All of the information, particularly pest management science, has been checked to ensure that it is up to date. Actual images for the pest biology section helps to make this publication a delight to read.

The PestWest Training Manual has over 190 pages covering essential topics such as: Principles and Biology of Pests. Sections cover a diverse range of subjects, including IPM, physical controls, chemical controls, legislation, HACCP, personal protective equipment, health and safety, training, waste disposal, a directory of useful addresses and websites.

The pest biology section includes comprehensive information on a wide range of pests of public health significance, gained from many years of experience in advising the pest management industry. Get your own copy at your favorite distributor or contact PestWest today.
