

# FUSE<sup>®</sup> FOAM

## Ready-to-Use Termiticide/Insecticide

**Contains Fipronil and Imidacloprid:** The same proven, non-repellent active ingredients as our **Fuse<sup>®</sup> Termiticide/Insecticide**, but in a ready-to-use foam that is easy-to-apply.

**For Direct Injection:** Into termite and ant nests and galleries, structural voids, and other listed sites.

**Fuse Foam** is the latest addition to the Control Solutions Inc. (CSI) family of products for managing termites and other wood destroying pests. This **Combination Chemistry<sup>®</sup>** product utilizes both Fipronil and Imidacloprid in a ready-to-use, expanding foam. **Fuse Foam** gives PMPs the opportunity to begin treating a structure immediately, right on the sales call; then schedule the full treatment for later.

**Fuse Foam** could be the most important tool in the toolbox when it comes to stopping termites and ants, and preventing their spread inside a structure. With a 30:1 expansion ratio, **Fuse Foam** gives PMPs the ability to reach those tough-to-treat places with confidence.

<b>Active Ingredients</b>	0.005% Fipronil 0.025% Imidacloprid
<b>Effective Against</b>	Termites, ants, wood-boring beetles, some occasional invaders
<b>Packaging</b>	6 x 20 oz/case (136 cases/pallet)
<b>Application Rate</b>	Ready-to-Use foam
<b>Modes of Action</b>	Interrupt the insects' nervous systems
<b>Signal Word</b>	Caution
