

InVite™

multi-insect lure

Pheromones for a Variety of Beetles & Moths in a Food Attractant Base

InVite™ Multi-Insect Lure is a blend of multiple pheromones in a thickened food oil base that protects the pheromone prior to use and provides a more uniform release after application. The oil also functions as a food attractant.

- Contains pheromones for attracting cigarette beetles, red and confused flour beetles, warehouse and kharpa beetles, Indian meal moths, and almond and Mediterranean flour moths

- Non-toxic, non-pesticidal formula
- For discreet trapping in areas such as retail stores,

InVite™ Multi-Insect Lure can be placed in a D-Sect™ IPM Station (page 28)

- For high-volume trapping in dusty areas, InVite™ Multi-Insect Lure can be placed in a Yellow PFT™ Station (page 27)
