Solenopsis spp. up to 1 year

Virginia

For Application by Pest Control Operators

RESTRICTED USE PESTICIDE

Sweep up spilled granules, transfer to a marked container, and dispose of wastes on site or at a waste disposal facility.

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

South Carolina

For Application by Pest Control Operators

RESTRICTED USE PESTICIDE

Do not apply within 60 feet of estuarine bodies of water. Estuarine water bodies are brackish, tidal water such as bays, mouths of rivers, salt marshes, and lagoons.

Do not use this product within 500 feet of areas occupied by the threatened Florida scrub jay, bluetail mole skink, or sand skink. In addition, for the protection of the threatened bluetail mole skink and sand skink, apply to outdoor nursery sites before placement of the containerized plants into the treated area.

Ctenacephalides spp., on turfgrass and landscape beds. Additional insects such as fleas, ticks and nuisance ants may be controlled for a limited time after application.

Arkansas

If the zip code for the area

Tribe, consult the agency responsible for pesticide regulation.

Restrictions:

* Applications can only be made from

• For all areas except sodfarms within the USDA APHIS Quarantine area, do not apply more than 1 application per year of 87 lbs. (0.0125 lbs. ai) per acre.

• Do not broadcast near any storm drains.

areas including

- Applications for Turfgrass, Landscape Beds and Outdoor Nursery Sites for Containerized Ornamental Plants as a broadcast treatment.

To control Imported Fire Ants, Solenopsis spp., Rhipicephalus spp., Ixodes spp., and Ctenacephalides spp., for up to 1 year, apply to outdoor nursery sites before placement of the containerized plants into the treated area.

Use this product in accordance with its labeling and with the Worker Protection Standard, 40 CFR 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, including notification of workers about personal protective equipment (PPE), notifications to workers and restricted-entry intervals. The requirements in this box only apply to sodfarm uses of this product that are covered by the Worker Protection Standard.

When handlers use closed systems or enclosed cabs in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural practices (40 CFR 170.240 (d) (4-6), the handler PPE equipment must wear:

• shoes plus socks
• waterproof gloves
• and other handlers, and have such PPE available for use in an emergency, such as a spill or equipment breakdown.

* Applications for Turfgrass, Landscape Beds and Outdoor Nursery Sites for Containerized Ornamental Plants as a broadcast treatment.

Restrictions:

* Applications can only be made from

• For all areas except sodfarms within the USDA APHIS Quarantine area, do not apply more than 1 application per year of 87 lbs. (0.0125 lbs. ai) per acre.

• Do not broadcast near any storm drains.

HOW MUCH TO APPLY:

Apply 87 lbs. of TAURUS G per acre (2 pounds of TAURUS G per 1,000 sq. ft.).

HOW TO USE:

Restrictions:

* Applications can only be made from

• For all areas except sodfarms within the USDA APHIS Quarantine area, do not apply more than 1 application per year of 87 lbs. (0.0125 lbs. ai) per acre.

• Do not broadcast near any storm drains.

Read entire label before using this product.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.
